

Système douche coulissant : Cas 5

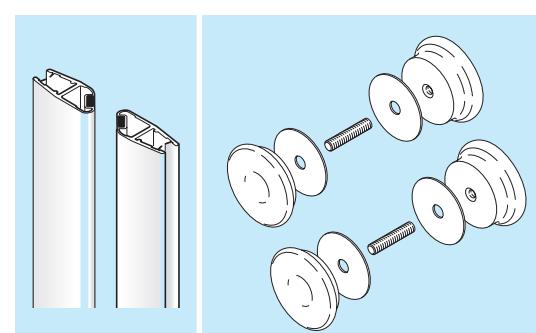

Sliding Shower System : Case 5

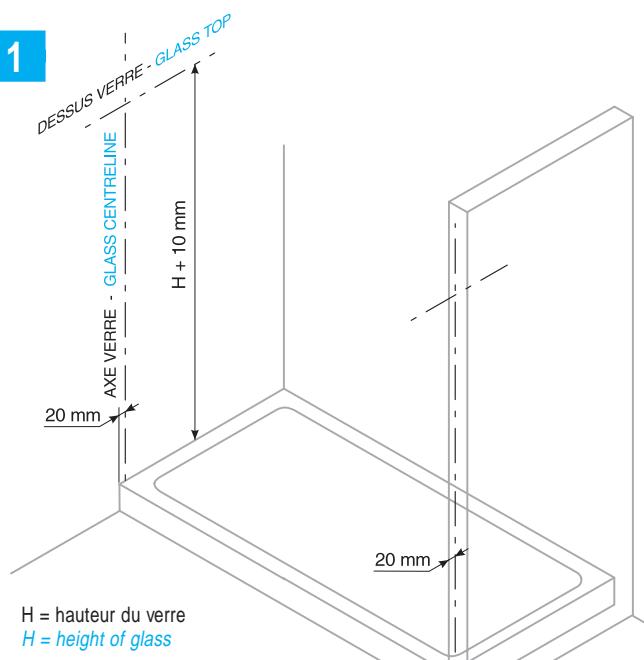

- Accès de face
Front Access
- Deux ouvrants coulissants et un panneau fixe de chaque côté
Two sliding panels with a fixed panel on each side
- Distance entre murs jusqu'à 2 200 mm
Distance between walls up to 2 200 mm
- Poids maxi de la porte 30 kg
Maximum weight of door 30 kg
- Épaisseur des verres : 8 mm
Thickness of glass panels : 8 mm

Ref KIT : 2820.xx.5	
Nb	Désignation
4	Pièces de fixation verre mobile
4	Chariots
4	Arrêts
2	Pièces de fixation verre fixe
2	Guides verre mobile
1	Rail alu lg 2 200 mm
2	Supports de rail
1	Clé de réglage à ergots
1	Profil inférieur lg 2 200 mm
1	Obturateur pour seuil lg 1 200 mm
2	Profils de compensation lg 2 000 mm
2	Joints pour profil de compensation lg 2 000 mm
2	Jeux de boutons de manœuvre
1	Jeu de joints magnétiques 180°

KIT ref : 2820.xx.5	
Qty.	Description
4	Fittings for moving panel
4	Runners
4	Stops
2	Fittings for fixed panel
2	Guides for moving panel
1	Aluminium track 2200 mm long
2	Track mountings
1	Lugged adjusting tool
1	Bottom profile 2200 mm long
1	Sill cover 1200 long
2	Correcting profiles for fixed panel 2000 long
2	Seals for correcting profile 2000 long
2	Sets of knobs
1	Set of magnetic seals 180°

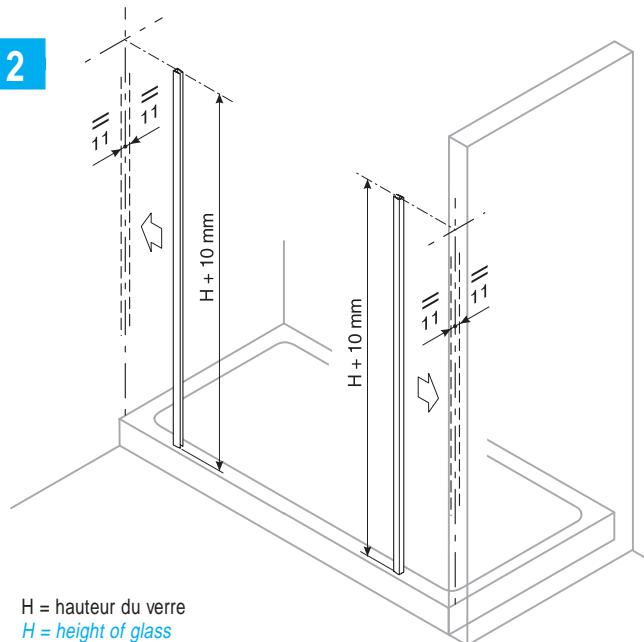

1

TRAÇAGE DES AXES DE RÉFÉRENCE

- Tracer de chaque côté un axe vertical (axe verre), à une distance de 20 mm du bord extérieur du receveur, vers l'intérieur de la cabine.
- Tracer de chaque côté un axe horizontal (dessus verre) à une distance du receveur égale à la hauteur du verre fixe augmentée de 10 mm ($H + 10 \text{ mm}$).

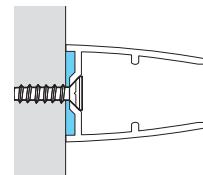

MARKING OUT THE WALLS

- On each side mark a vertical centre line for the panel positions 20 mm from the edge of the shower base towards the interior of the shower
- On each side mark a horizontal line (top of panel) at a distance from the shower base 10 mm more than the height of the panel ($H + 10 \text{ mm}$)

2

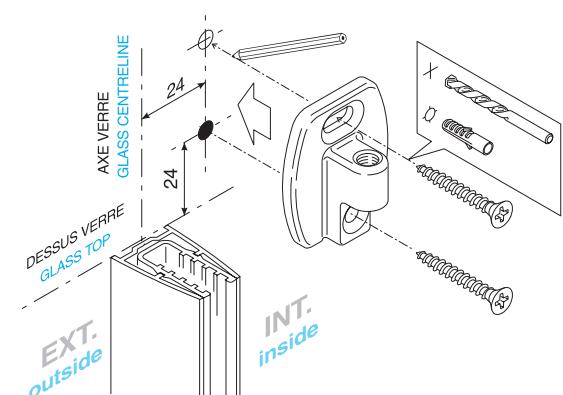

FIXATION DES PROFILS DE COMPENSATION

- Couper les profils à une hauteur de 10 mm supérieure à celle des verres ($H + 10 \text{ mm}$).
- Fixer (silicone + vis TF Ø 4 mm) les profils aux murs dans l'axe de référence.

FIXING CORRECTING PROFILES

- Cut the profiles 10 mm longer than the height of the panels ($H + 10 \text{ mm}$).
- Fix the profiles (silicone + slotted screws Ø 4 mm) to the wall, centred on the reference lines.

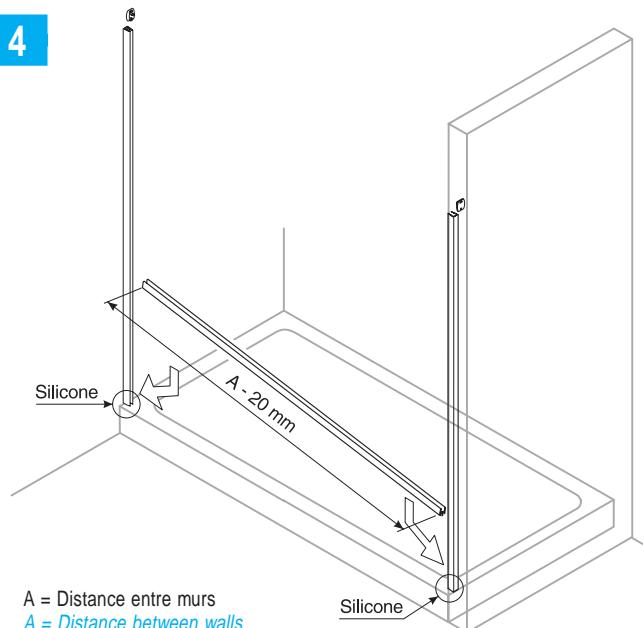

3

FIXATION DES SUPPORTS DE RAIL

- Fixer les supports de rail vers l'intérieur de la cabine (voir schéma).

FIXING THE MOUNTINGS FOR THE TRACK

- Fix the mountings in position towards the inside of the shower (see diagram).

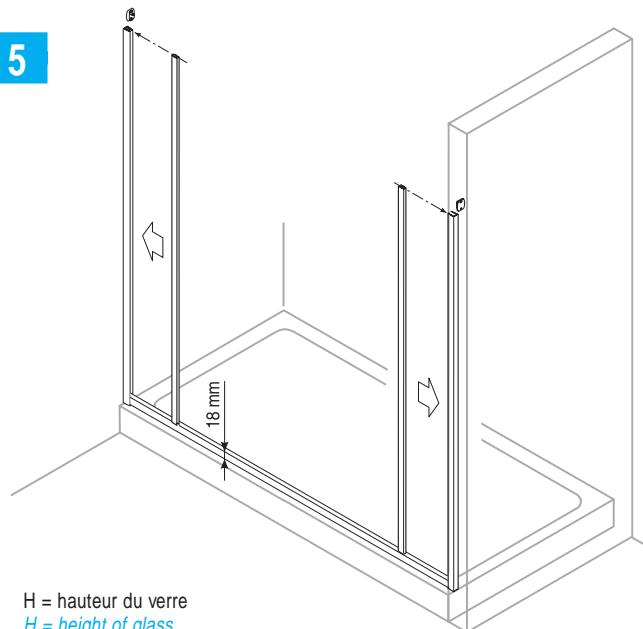

4

POSE DU PROFIL INFÉRIEUR

- Couper le profil inférieur suivant schéma (A - 20 mm).
- Mettre en place le profil inférieur à l'intérieur des profils muraux (voir schéma).

FITTING THE BOTTOM PROFILE

- Cut the bottom profile as shown in the diagram (A - 20 mm).
- Place it in position between the wall profiles.

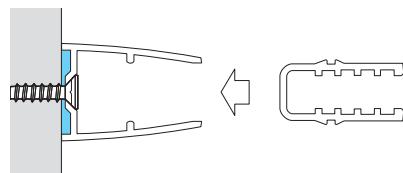

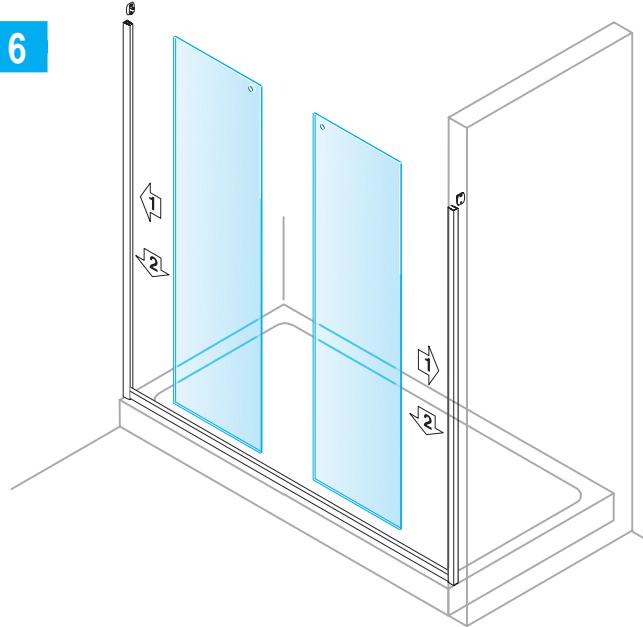

5

POSE DES JOINTS DE COMPENSATION

- Couper les joints 18 mm plus court que les profils de compensation.
- Insérer et encliquer les joints dans les profils.

FITTING THE CORRECTING SEALS

- Cut the seals 18 mm shorter than the correcting profiles.
- Insert the seals and click them into place in the profiles.

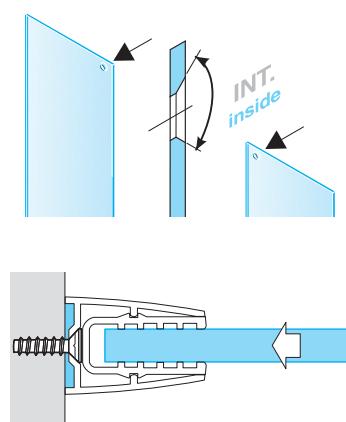

**6**

POSE DES VERRES FIXES

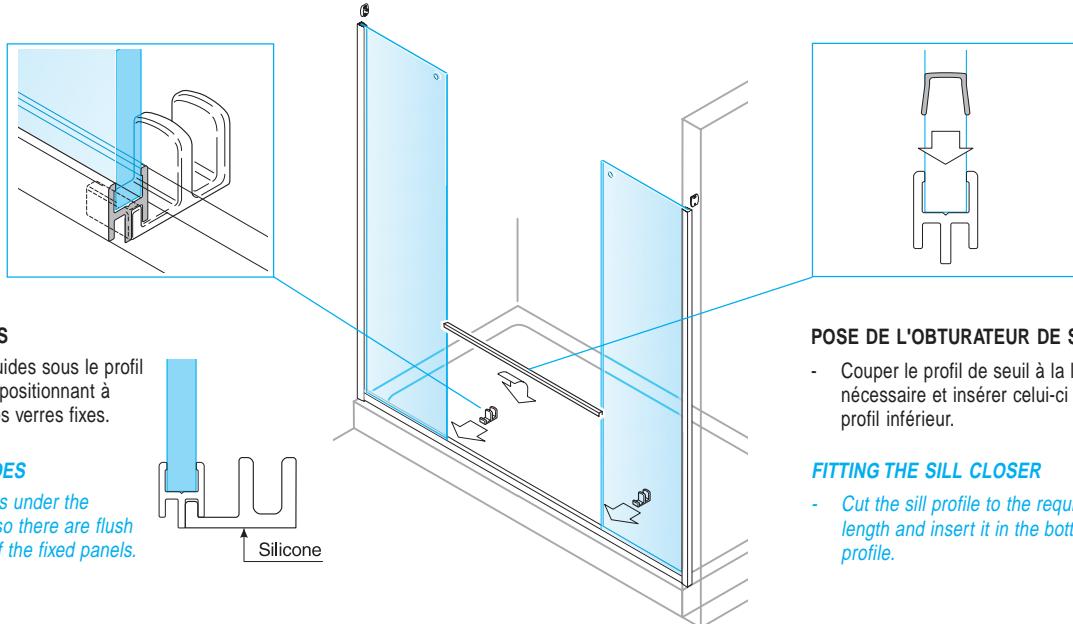

- Insérer les verres fixes dans les profils muraux, puis dans le profil inférieur.

FITTING THE FIXED PANELS

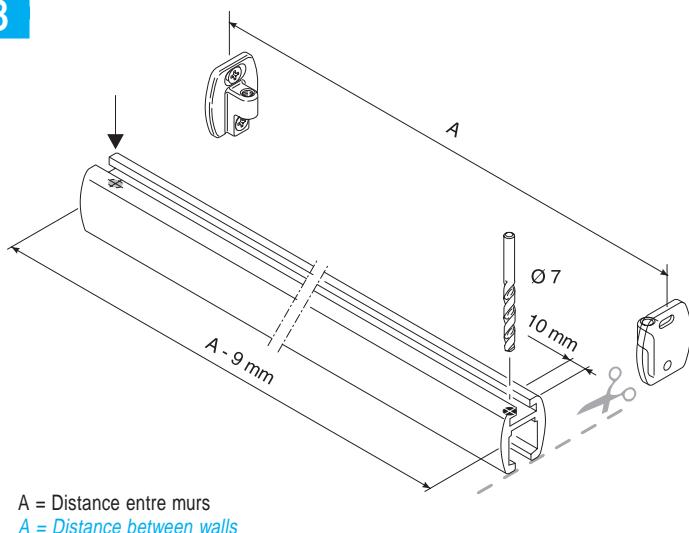

- Insert the fixed panels in the wall profiles, then into the bottom profile.

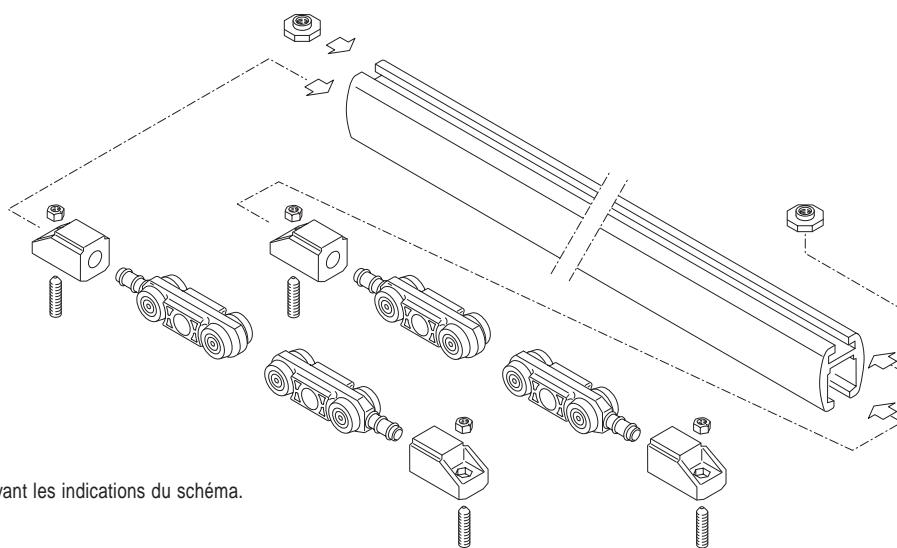

7

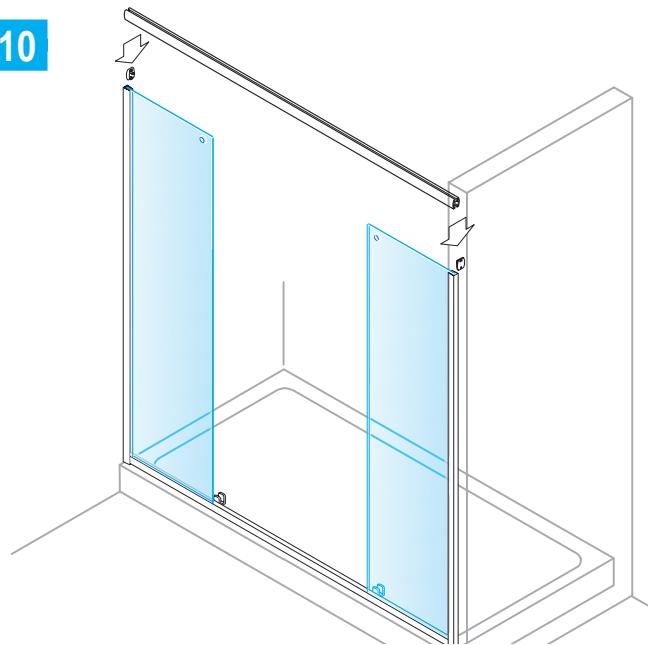

8

9

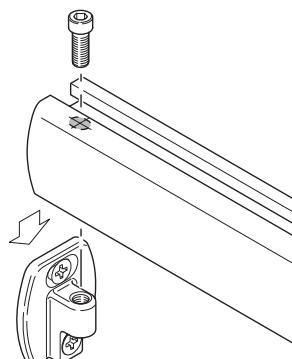

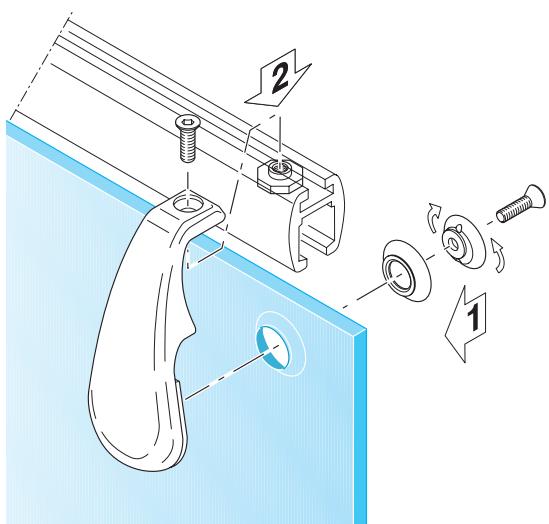

10**POSE DU RAIL**

- Engager le rail équipé sur ses deux supports.
- Fixer le rail avec les 2 vis CHC fournies.

INSTALLING THE TRACK

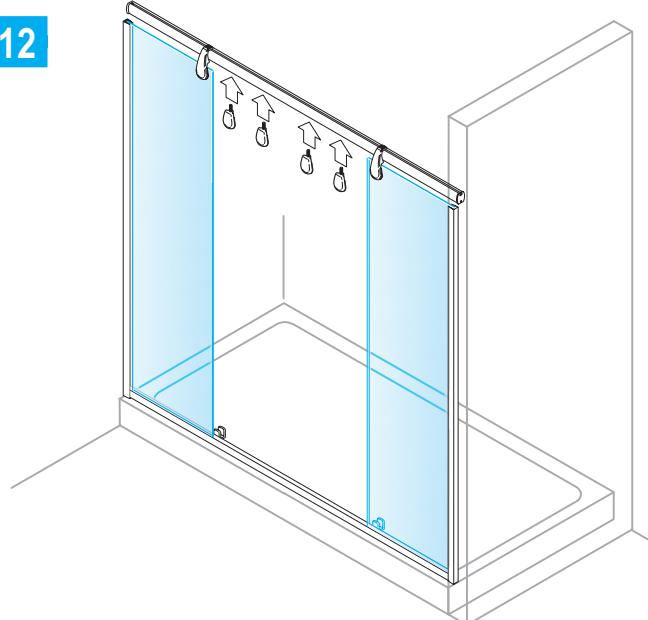

- Fit the track together with its fittings onto the two mountings.
- Fix it in position with the two Allen screws provided.

**11****MONTAGE DES PIÈCES FIXES**

- 1 - Assembler les pièces fixes sur les verres (voir schéma).
- 2 - Fixer les ensembles sur le rail.

ASSEMBLING THE FIXED PARTS

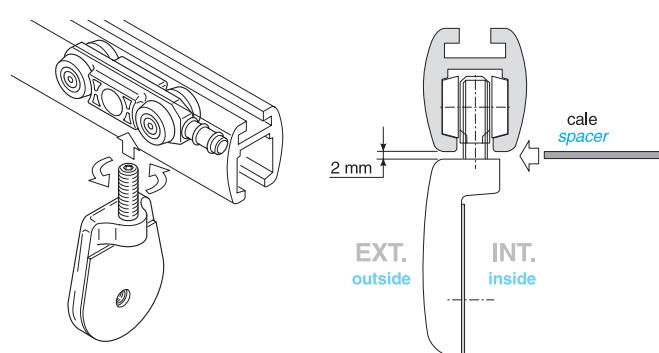

- 1 - Assemble the fixed parts onto the panels (see diagram).
- 2 - Fix the whole assembly onto the track.

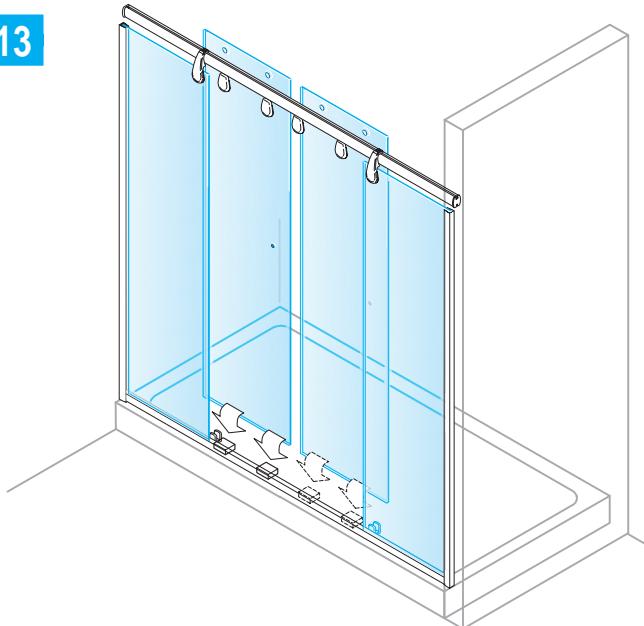

12**MONTAGE DES PIÈCES MOBILES**

- Visser les quatre pièces mobiles sur leur chariot en laissant un espace de 2 mm entre elles et le rail (utiliser la cale fournie).
- Positionner et bloquer les arrêts de chariot à chaque extrémité du rail.

ASSEMBLING THE MOVING PARTS

- Screw the four moving parts into their runners leaving a 2 mm space between them and the track. (Use the spacer provided)
- Position the stops and lock them into place at each end of the track.

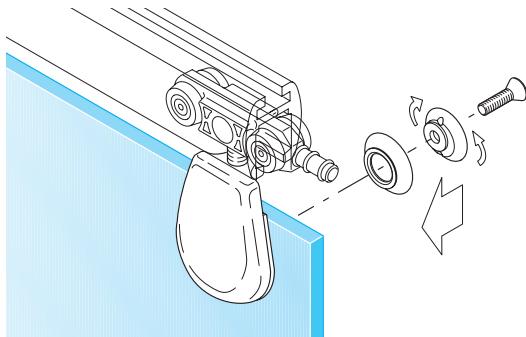

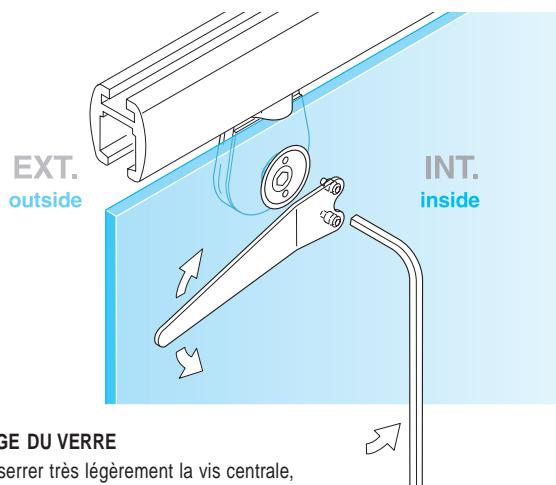

13**POSE DES VERRES MOBILES**

- Disposer deux cales de 10 mm d'épaisseur sur le receveur pour faire reposer chaque verre
- Assembler les pièces mobiles sur les verres (voir schéma).

FITTING THE MOVING PANELS

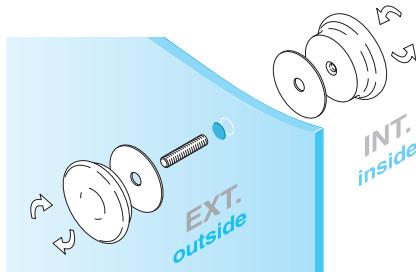

- Place two 10 mm thick spacers on the shower base to rest each panel on.
- Assemble the moving parts onto the panel (see diagram).

**14****RÉGLAGE DU VERRE**

- Desserrer très légèrement la vis centrale, tourner la clé à ergots pour faire les réglages.

ADJUSTING THE PANEL

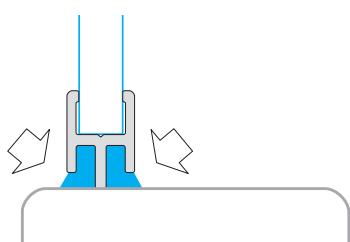

- Slightly unscrew the central screw, and use the lugged tool to make adjustments.

15**MONTAGE DES BOUTONS**

- Assembler les boutons sur les verres.
- Placer le bouton le moins épais du côté extérieur.

ASSEMBLING THE KNOBS

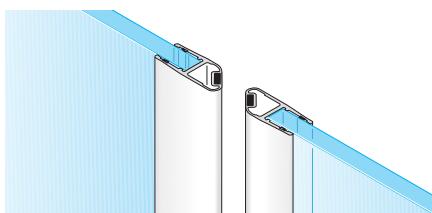

- Fit the knobs to the sliding panels.
- The thinner knobs go on the outer side.

16**POSE DU JOINT DE SILICONE**

- Extruder du silicone des deux côtés sous le profil.

APPLYING SILICONE SEALANT

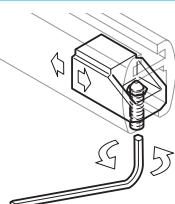

- Apply a bead of silicone on both sides below the profile.

17**POSE DES JOINTS MAGNÉTIQUES**

- Couper les joints à la hauteur des verres et emboîter ceux-ci sur la tranche des volumes coulissants.

FITTING THE MAGNETIC SEALS

- Cut the seals to the height of the panels and fit them over the edges of the panels.

18**RÉGLAGE DES ARRÊTS DE CHARIOT**

- Vérifier le bon positionnement et le blocage des arrêts de chariots.

ADJUSTING THE STOPS

- Check the correct position for the stops and lock them in place.
